The *Routledge Series on Interpretive Methods* comprises a collection of slim volumes, each devoted to different issues in interpretive methodology and its associated methods. The topics covered will establish the methodological grounding for interpretive approaches in ways that distinguish interpretive methods from quantitative and qualitative methods in the positivist tradition. The series as a whole engages three types of concerns: 1) methodological issues, looking at key concepts and processes; 2) approaches and methods, looking at how interpretive methodologies are manifested in different forms of research; and 3) disciplinary and subfield areas, demonstrating how interpretive methods figure in different fields across the social sciences.
